

Want to hear what the key players thought of the discussions in Vilnius?
Open your browser on the 20th of September and participate in the first Finnish Internet Forum!

The forum will take place on Monday 20th and Tuesday 21st of September in Helsinki, immediately after the 5th international IGF in Vilnius. The discussions promise to be exciting: they tackle the present and future of the governance of the internet, and as a special theme, its social dimensions, including the potential of internet in peace-building.

The event in the auditorium of the Finnish Parliament is unfortunately already fully booked, but no worries – the whole event will be webcasted. Monday's discussions are all held in English and involve keynote international speakers, who are going to comment on the themes of the discussions in Vilnius, and bring up new ones especially relevant considering other topics of the Helsinki conference. Tuesday's programme is in Finnish, as it will concentrate more on the specific Finnish context of internet governance.

We will seek to involve you as viewers of the webcast in the discussions by letting you make comments and taking them up in the discussions in Helsinki. We look forward to hosting viewers all over the world on their personal computers.

On Monday 20th of September, IGF Finland welcomes you in www.internetforum.fi!
