IGF Meeting Text Clouds
2006-2010
Text Clouds

A Text Cloud illustrates the frequency of words found in the main session transcripts of all five IGF meetings from 2006-2010. The final text cloud combines all transcripts from all IGF meetings to produce an overall representation of the initial 5 years. The larger the text size in each cloud the more frequent that word appeared throughout the meeting. Colors denote no meaning and were used purely for aesthetic value. Slides of the clouds are available here.
The Athens Meeting
The Rio de Janeiro Meeting
The Hyderabad Meeting
The Sharm el-Sheikh Meeting
The Vilnius Meeting
