Field summary for E

Right to Liberty and Security on the Internet - ... All security measures must be consistent with international human rights law and standards. This means that security measures will be illegal where they restrict another human right (for example the right to privacy or the right to freedom of expression) except for in exceptional circumstances. All restrictions must be precise and narrowly defined. All restrictions must be the minimum necessary to meet a genuine need which is recognized as legal under International law, and proportionate to that need. ...

Right to Legal Remedy and Fair Trial for actions involving the Internet - a) Right to a Legal Remedy. ...; b) Right to a Fair trial. ... It is increasingly common for the right to a fair trial and to an effective remedy to be violated in the Internet environment, for example with Internet intermediary companies being asked to make judgments about whether content is illegal and encouraged to remove content without a court order. It is therefore necessary to reiterate that procedural rights must be respected, protected and fulfilled on the Internet as they are offline. c) Right to Due Process. Everyone has the right to due process in relation to any legal claims or possible violations of the law regarding the Internet.
