Internet Governance Stakeholders could consider Core Internet values as a set of values that the Internet ought not to slip away from. The architectural values – Internet as dumb technology, end to end architecture, Interoperability, Openness evolving as a Global undivided neutral ecosystem - values arising out of the Internet's design by the intent of the early inventors and the natural evolution of the Internet beyond their intent, could be deemed as unalterable Core Internet Values.

Do you agree?

Strong Agreement  Agreement  Neutral  Disagreement  Strong Disagreement  Confusion
