EuroDIG

European Dialogue on Internet Governance

EuroDIG 2021, Virtual meeting
Report by the EuroDIG Secretariat

September 2021

Foreword

EuroDIG 2021 took place from 28–30 June 2021. This included a Day 0 on which organisations and initiatives could present their work, and engage with the community, followed by two full days of multi-stakeholder workshops and high-level debates. The theme of this year's discussions: "Into Europe's Digital Decade".

Given the evolution of the pandemic situation across Europe, and our concern for the health of our community, EuroDIG 2021 was again held fully online. This allowed us to build on our experience from 2020 and the rapid development in holding online meetings, which have become standard within the Internet community and beyond.

   With this report we would like to illustrate how participation in the virtual EuroDIG has evolved from 2020 to 2021. In order to get a clear indication on the differences between the two years we included the same set of questions in our feedback form, the results of which are the main focus of this report.

   Our overall concept was very similar to last year. Therefore, we will not repeat all the details already compiled in the **2020 virtual meeting report**.

We hope that these facts and figures serve as input for upcoming discussions when the effectiveness of online meetings in general is evaluated. We hope that this information and analysis can contribute to the development of effective hybrid meeting formats and help organisers to weigh pro and cons of the different approaches.

Many thanks to all participants who provided their feedback on the EuroDIG 2021 virtual meeting!

Table of contents

I. Concept

EuroDIG in June 2020 was among the first events that had traditionally had been organised as a physical meeting, to be held as an online-only meeting. The aim of EuroDIG is to create a platform for intensive exchange before and during the annual meeting, by including all stakeholder groups. The feedback that we received last year was very positive and EuroDIG 2020 was considered to be among the best virtual meetings in our community.

The safety of everyone involved was an absolute priority in 2021 too and we continued in online-only mode.
Studio Bruges (Belgium), powered by the United Nations University, Instiute on Comparative Regional Integration Studies (UNU-CRIS)
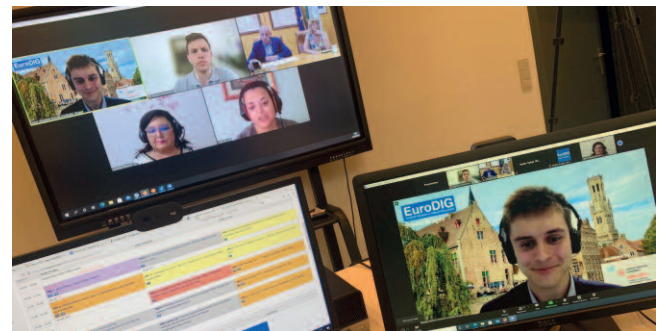

Studio Belgrade (Serbia), powered by the Serbian National Internet Domain Registry Foundation (RNIDS)

Studio Trieste (Italy), powered by The Abdus Salam International Centre for Theoretical Physics (ICTP)

We kept the concept of setting up Studios across Europe to host the sessions while technically connected to and managed by the headquarters studio based in Leipzig/Germany. Colleagues supported EuroDIG 2021 from Italy (Trieste), Serbia (Belgrade) and Belgium (Bruges).

A compact 3-day format was developed, the same as for physical meetings. We decided to keep this format based on feedback that a majority of participants supported this approach for the virtual meeting in 2020. However, new session formats were introduced already in January, that would work for a hybrid as well as for a fully virtual meeting.

With shorter session slots and longer breaks we intended to meet:

1. requests to have more time for informal exchanges and networking (if meeting in person would have been possible), and
2. the need to incorporate safety measures to deal with the pandemic (i.e. not spending too much time in closed rooms and sanitising them after a short while)

As a result, workshops were shortened to 60 minutes and Focus Sessions were introduced as a new format, replacing traditional plenaries. Focus Sessions are made up of three segments: 45 minutes of input by high level speakers; 45 minutes of breakout to discuss in more depth and in smaller groups; and 45 minutes output to reconvene and formulate the messages. This format allowed for more in-depth discussion than a plenary.

Day zero is traditionally the day where we offer Internet Governance-related organisations our facilities (in the virtual and the real world) to hold their working meetings or to present their work.

This year day zero was filled with sessions for the whole day across three parallel tracks. It was the busiest day zero we have ever seen.

Also, the number of workshops grew compared to past meetings and alongside the studios we opened the virtual amphitheatre for some session slots as well as the "big stage" presentations.

We also put effort into a social event and invited a magician who was doing a live show in the headquarters studio in Leipzig while interacting with the online audience. The audience for this social event, however, was not huge.

Welcome and keynotes were transmitted to all Zoom rooms in parallel.

Before and after each session the moderator in Leipzig called live into each studio for a short pre- and post-review.

From the headquarters in Leipzig we ran the full technical infrastructure for four sessions in parallel, monitoring operations in all location.
The magic live show from the headquarters studio in Leipzig also included interaction with the online audience.

II. Virtual meeting environment / Choice of tools

Many new tools to facilitate virtual meetings emerged in 2020-2021. We felt that EuroDIG participants would be keen to explore new tools, and we wanted to try something new, in addition to the traditional pillars:

1. remote participation (over Zoom)
2. streaming
3. captioning.

The forum for written exchange, that we created in 2020, proved not to be of value for fostering discussions among our participants, so we did not invest further in this approach.

Instead we built a virtual conference centre in gather.town, which allows the event planners to build custom virtual spaces that users can freely move around in with personal avatars. In this space networking was possible via audio and video when your avatar came close to another. Upon entry, pre-registered participants were required to sign in with their real name (same as for registration) and were instructed to respect our **Code of Conduct**. In this space we set up the three studios (Bruges, Belgrade and Trieste) and an amphitheatre, each of them representing an interactive Zoom meeting room. Users were required to walk their avatar to the studio where the session they wished to attend took place. From these studios you could connect to Zoom directly by pressing x on your keyboard. No additional link was needed.

You could also find a registration desk, booths, a Board Room for ad-hoc meetings, or you could enjoy the "outside" area and a fountain or bonfire. The feedback from participants on this new tool was quite diverse, from, "this is an additional hurdle!" to "great fun!"

Overview of the customised virtual conference centre in gather.town for EuroDIG 2021.
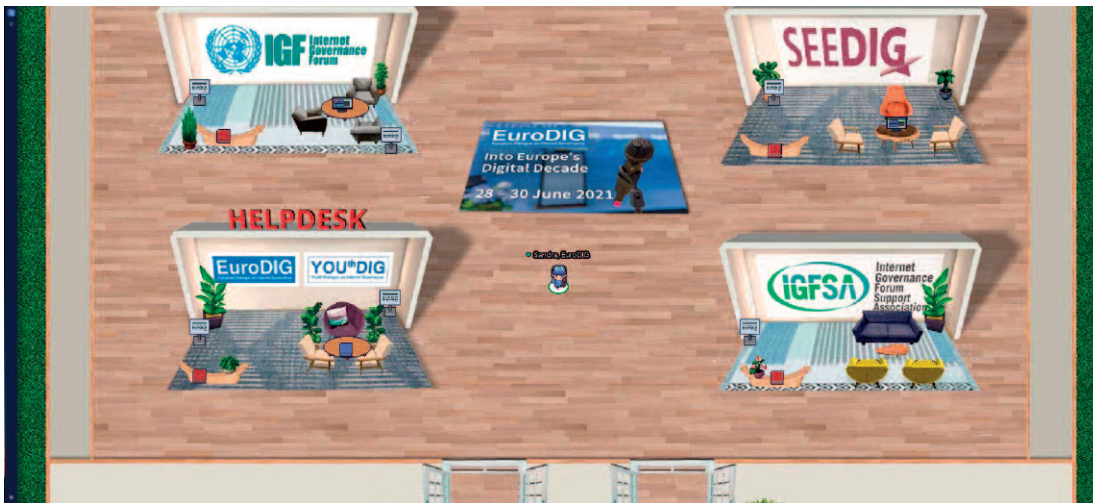

Booth area – At the booths private conversation was possible regardless of surrounding people.

Thanks to the host, supporters, partners and donors who made EuroDIG 2021 possible.

III. Breakdown of participation (2021 vs. 2020)

Overall, we received 703 registrations, which was about half the number from last year but close to what we usually saw at EuroDIG meetings. It is notable that about half of the participants registered just in time, when the event was already underway (some even registered just before they had a speaking role in one of the sessions). This made it difficult for them to get familiar with the new gather.town environment, although all speakers were also provided with direct Zoom links.

The analysis after the event showed that we had around 470 different people logging in to Zoom over the three days. Like last year, a significant number of participants were watching the stream, either live during the session or later, via the recording. However, the increased number of parallel sessions led to a decreasing number of participants per session. On average we saw 30-40 participants logged into Zoom.

Taking the numbers from Zoom and streaming/recording together we reached a number of participants comparable to last year or to what we would have expected from a physical meeting.

An example from Day 1 in Studio Bruges: 126 participants logged into the Zoom room. In addition, 14 participants (peak parallel views) followed sessions on this day via the live stream on YouTube. In total 130 unique participants watched the livestream or the recording of this studio on this day. As of 31 August 2021, a total of 139 people visited the recording.

Zoom rooms
Unique participants per day

Day 0		Day 1		Day 2

		Total costs 2021:	**28.448,00**
		Costs 2020	23.420,88

EuroDIG
European Dialogue on Internet Governance

EuroDIG is the regional, pan European Internet Governance forum.

DIG stands for 'Dialogue on Internet Governance', and is the unique selling point of the annual event that bring together Internet stakeholders from across the spectrum of government, industry, civil society, academia and the technical community.

Stakeholders and participants work over the course of each year to develop, in a bottom-up fashion, a dynamic agenda that explores the pressing issues surrounding how we develop, use, regulate, and govern the Internet. Participants come away with broader, more informed perspectives on these issues and new partners in responding to the challenges of the digital society.

More details at **eurodig.org**.
