1. ACKNOWLEDGEMENTS

The co-chairs1 of the Internet Governance Forum Multistakeholder Advisory Group (IGF MAG) Working Group on Internet Governance Forum Strengthening and Strategy (WG-Strategy) express their gratitude to the members of the Working Group who contributed time and information to the development of this document.

1 Concettina Casa, former MAG member, Amrita Choudhury, IGF MAG member, Roman Chukov former MAG member, Chris Buckridge IGF MAG member
2. INTRODUCTION

This document is a contribution from the Working Group on IGF Strengthening and Strategy (WG-Strategy) of the Internet Governance Forum Multistakeholder Advisory Group (IGF MAG) to the Expert Group process initiated by the IGF Secretariat to convene a two to three-day expert-level working retreat from 30 March to 1 April 2022 in New York. The retreat aims to discuss how the IGF can contribute to advancing digital cooperation and implementing proposed initiatives in this area, within the broader context of the ongoing process on strengthening and improving the IGF as a space for global multistakeholder discussion on Internet policy issues.

3. THE MAG WORKING GROUP STRATEGY

The Working Group on IGF Strengthening and Strategy (WG-Strategy) was established by the MAG in 2020. Its charter defines the main purpose of the WG that aims to develop proposals of actions implementable in the short and medium term on how to strengthen the IGF and position it strategically in the evolving digital cooperation landscape. Its action complement the MAG current activities (that are mainly focused on the organization of the next IGF) providing a long-term view and keeping a memory of the achievements of the past. In this sense the WG-Strategy involves expertise from past MAG members and IGF hosts.

The WG-Strategy’s focus is two-fold:

I. The mandate outlined for the IGF in the Tunis Agenda (2005) and how the IGF can best fulfill it with a forward-looking approach, taking into account that the IGF is more than halfway through its 10-year renewed WSIS mandate.

II. Broader discussions on digital cooperation, in particular the UN Secretary-General’s Roadmap for Digital Cooperation launched on June 11, 2020, which identifies priority topics that broadly overlap with the issues discussed so far with regard to IGF improvements. The Roadmap reflects the strong support from stakeholders worldwide for the “IGF+” model identified in the report of the High-Level Panel on Digital Cooperation (HLPDC), ‘The Age of Digital Interdependence’, and describes specific improvements to the IGF which the Secretary-General is committed to implementing (paragraphs 93-94).

The approach of the WG is to improve the IGF by responding to identified gaps in the functioning
of the IGF, focusing in particular on those improvements which can be implemented by the MAG/IGF itself, while at the same time analysing and responding to suggestions in the Roadmap, and liaising between the Roadmap process and the IGF MAG and Secretariat.

The WG-Strategy holds regular meetings every two or three weeks and has activated a close link with the Office of the Envoy for Technology that updates the WG on the ongoing activities related to the Roadmap for Digital Cooperation and to the “Our Common Agenda” report. This link, formed on behalf of the MAG, needs to be strengthened and operationalized once the new Tech Envoy is appointed, with a view to ensuring that the IGF is considered one of the primary tools for implementing the UN strategy on digital cooperation.

4. ACTIVITIES AND PROPOSALS BY THE WG-STRATEGY

The results of discussions and the main documents drafted by this Working Group are available on the IGF website. They include several documents issued by the Working Group and shared with the IGF MAG, UNDESA, the UN Secretary-General’s team working on Global Digital Cooperation and the co-champions of Recommendation 5A/B of the HLPDC’s report.

1) The Response to the paper “Options for the Future of Digital Cooperation”

2) Three possible approaches on how to operationalize the IGF’s Multistakeholder High-level Body (MHLB, later known as the Leadership Panel) outlined in para. 93 (a) of the UNSG Roadmap for Digital Cooperation annexed to the above document.

4) The “MAG Working Group on IGF Strengthening and Strategy (WG-strategy) proposal on IGF2021 design and process, December 2020”

The Working Group has also undertaken an exercise that maps IGF activities to the Roadmap activities (see attachment) to discuss the roles of the IGF and the national and regional IGFs (the NRIs) in the Global Digital Compact included in the “Our Common Agenda” report.

The WG-Strategy has asked that all these documents be officially sent to the EGM, via the IGF secretariat, and that they (along with the proposals in this document) be considered as working documents to the EGM process.
5. SUGGESTIONS TO THE EGM FROM THE WG-STRATEGY

The expected outcomes of the EGM are outlined on the IGF website and they include two groups of recommendations (group A and B):

A. Recommendations on how the IGF can “adapt, innovate and reform” its work and contribute to implementing proposed initiatives dedicated to advancing digital cooperation and creating an ‘open, free and secure digital future for all’. These recommendations – which should take into account the availability of resources – could cover:

1. What improvements can be made to the format and work of the Forum in order to strengthen focus, relevance and improve links with decision-making fora, and develop effective and influential outputs?
2. How to improve the alignment of IGF activities with the action lines included in the Roadmap for Digital Cooperation (para 93a)?
3. What role could the IGF play in ensuring multistakeholder engagement and providing inputs in developing the Global Digital Compact proposed in the Our Common Agenda report?
4. How the IGF should work with various decision-making and discussion fora in the expanding field of digital development.

B. Recommendations on how to operationalise recurring proposals regarding IGF strengthening and improvement, in areas such as:

1. Implementing the IGF Leadership Panel
2. Growing the engagement of those stakeholders who are currently unengaged, with a view to expanding and diversifying participation in the IGF processes;
3. Ensuring sustained and regular funding to support the IGF and the IGF Secretariat.

In the last two years, the Working Group has addressed all these issues and considers it extremely important to share with the EGM its progress and recommendations as contributions to the discussions of these issues at the forthcoming retreat.

If any member(s) of the Working Group is/are invited to join the EGM, they will be asked to represent in that arena these ideas and suggestions. If not, the Working Group will request Anriette Esterhuysen, who has been engaged since the inception of this group, to share her reflections on the ideas and suggestions.
A1 - Improvements that could be made to the format and work of the Forum in order to strengthen focus, relevance and improve links with decision-making fora, and develop effective and influential outputs

The WG believes that while the linkages between the IGF and decision-making bodies and processes already exist, they should be more consistent, systematic and outcome-oriented. Some of the approaches adopted to strengthen the linkages with the NRIs and youth could be helpful in achieving this, for example, through the IGF Secretariat including staff whose primary function is to manage the links with decision-making bodies in all stakeholder groups, including governments and parliamentary bodies. The links with decision-making bodies should take place throughout the entire IGF annual work cycle, including the preparatory phase for the annual forum; its intersessional activities, notably the IGF's policy networks, dynamic coalitions and best practice fora; the annual forum itself; and the outcomes of the annual forum and the intersessional activities.

The WG-Strategy has engaged in extensive discussions on strengthening the interaction between the IGF and public and private sector decision-making bodies worldwide. The outcomes of these consultations are reflected in the WG-Strategy’s “priorities document”. Key recommendations made in this document include:

- The need to integrate a two-way communication between the IGF and decision-making bodies into the evolution of the IGF.
- MAG members from the different stakeholder groups should proactively engage with their communities in order to secure buy-in into the program-development process.
- Specific and continuous outreach to governments should be undertaken by the IGF Secretariat and the MAG to secure their active participation in intersessional work, main sessions and high level sessions, and workshops, e.g. with the occasion of intergovernmental events such as CSTD sessions, or of other multistakeholder arena such as the WSIS Forum etc.
- High-level sessions and main sessions should be an integral part of the program and aspire to secure the widest and highest-level representation from all stakeholder groups as possible.
- Invitations to secure the participation of high-level representatives from all stakeholder groups should be sent out as early as possible, and at least 6 months before the IGF annual event takes place.

A2 - Improve the alignment of IGF activities with the action lines included in the Roadmap for Digital Cooperation (para 93a)

The WG-Strategy has activated an exchange channel between the Office of the Tech Envoy and the MAG/IGF and started to draft the mapping document of IGF and Roadmap activities as an ongoing, rolling document. The WG suggests that this document be maintained and updated.

A3 - Define the role of the IGF in ensuring multistakeholder engagement and providing inputs in
developing the Global Digital Compact proposed in the 'Our Common Agenda' report

The WG-Strategy thinks that IGF should play an important role in ensuring multistakeholder engagement and providing inputs to the development the Global Digital Compact, and that the IGF could be used as platform for Roadmap implementation activities, be it in the annual event or in the intersessional work.

**A4 - How the IGF should work with various decision-making and discussion fora in the expanding field of digital development.**

IGF needs to strengthen and intensify its relations with all those fora where decisions could be taken on matters that concern Internet governance. A common agenda of Internet governance-related decision-making process needs to be elaborated and constantly updated, with the help of the Office of the Tech Envoy, so that the IGF can interact with these decision-making bodies and provide them with timely, accurate, and multi-stakeholder feedback, which could improve the quality of those decisions and verify the consensus across all stakeholder groups.

Further, today where there is a call for transparency and accountability related to digital development, the IGF can play a critical role in encouraging transparency and accountability when dealing with various decision-making and discussion bodies. The IGF should be the trusted platform always calling all actors to abide by best common practices.

**B2 - Growing the engagement of those stakeholders who are currently unengaged, with a view to expanding and diversifying participation in the IGF processes;**

IGF needs to revitalize and to improve the quality and level of participation of the network of the international organizations' representatives attending MAG meetings and participating in IGF activities. They need to become true “liaison officers” that act as two-ways communications conduits, informing of reciprocal initiatives and promoting active cooperation between IGF and those bodies.

**B3 - Ensuring sustained and regular funding to support the IGF and the IGF Secretariat.**

Fund-raising strategy and efforts are needed to sustain the IGF activities. The IGF Secretariat should expand the pool of donors and explore new ways of raising funds, such as potential partnerships with philanthropic organizations with interest in supporting work on Internet governance, including those that are engaging with the Roundtable process to implement the Secretary-General’s Roadmap for Digital Cooperation.
It would also be helpful to explore possibilities for enabling tax-deductible donations, and to ensure that stakeholders are aware of any subsequent arrangements put in place. According to the UN Charter and related legal instruments and financial regulations, non-governmental donor contributions to the UN are not permitted to be tax deductible.

It would also be valuable to look into possible mechanisms for “small contributions” in a way that would work under the UN’s legal instruments and financial regulations, without the administrative processes required for the 5 and 6-figure donations currently made to the IGF Trust Fund. It should not be underestimated that even small contributions (e.g., $50-$500) received from the global Internet Community can add up to a significant amount, as well as increasing the number of financial contributors who will feel further invested in the process by making a financial contribution.
