GIPO Observatory Tool flash session for NRIs

Katarzyna Jakimowicz
April 2017
What is GIPO Observatory Tool & what does it do?

The GIPO Observatory Tool:
• helps you monitor Internet-related policy developments
• allows you to filter all information according to different criteria (areas, tags, world regions etc.)
• uses advanced IT technologies you can take advantage of to present information on many different media (your website, apps or other)

Initiated by the European Commission

http://observatory.giponet.org/

The Global Internet Policy Observatory (GIPO) project is supported by the European Commission
Why do we need it?

Information can be too complex…

… and overwhelming…

GIPO makes it easy for larger and smaller players

The Global Internet Policy Observatory (GIPO) project is supported by the European Commission

Source: Association for Progressive Communication
Goals

Capacity building

Confidence building

Approximation of positions

More informed discussions

The Global Internet Policy Observatory (GIPO) project is supported by the European Commission
Which areas does GIPO cover?

- Infrastructure
- Human rights
- Economic
- Sociocultural
- Security
- Legal
- Development
GIPO Observatory Tool – The concept

New IT Technologies
Data mining, semantic analysis, data visualisation tools

Open Access Information
Articles, papers, conference proceedings, websites, forums, newsletters, blogs....

GIPO
Automatically collect content, analyse information, and visualise key data

http://observatory.giponet.org/

The Global Internet Policy Observatory (GIPO) project is supported by the European Commission
Visualise and customise through dashboard

http://observatory.giponet.org/dashboard/
A dashboard helps you to:

• Spot the burning issues of the day.

• Search for topics of your interest.

• See in which countries and regions your topics are unfolding most often at the moment of your search.
You can connect the tool to your website!

- Use **RSS feeds** and the **GIPO API** to customise information selection according to your interests.

- GIPO will automatically collect, analyse and process information from web sites and social media (including documents and tweets) and deliver it to your website visitor.

- It will classify the information for maximum relevancy and return it for further reuse.
Every issue page has a RSS feed. Most recent entries can be embedded in any website.
Every issue page has a RSS feed. Most recent entries can be embedded in any website.

The Global Internet Policy Observatory (GIPO) project is supported by the European Commission.
Security

The public issues in the security basket aim to ensure stable, functional and reliable use of the Internet. Cybersecurity is a policy issue. Other more specific security-related issue include: cybercrime, protection of the Internet as a critical infrastructure, nuclear conflict, Child safety online, encryption, spam, and digital signatures.

The Trinidad and Tobago Multistakeholder Advisory Group (TTMAG) is an independent entity for the promotion and development of best practice policy standards for the .tt country code Top Level Domain (ccTLD) and the local Internet ecosystem in the interest of the Internet Community.

Learn more about the TTMAG, its purpose, and its directors.

You can follow our activities on Twitter and Facebook. Our email address is info@mag.tt

Trinidad and Tobago Internet Governance Forum on January 26 2017!

The first Trinidad and Tobago Internet Governance Forum (TTIGF) will be held on January 26th, 2017, from 9AM to 1 PM at the Marriott Courtyard in Port of Spain.

The Internet Governance Forum (IGF) is a forum for multistakeholder dialogue on public policy issues related to key elements of Internet governance issues, such as the Internet’s sustainability, robustness, security, stability, access and development.

The first Trinidad and Tobago IGF will include a panel discussion on the theme “The Role of the Internet and the Digital Economy in the Sustainable Development of Trinidad and Tobago”. The panelists are all experts in the field, and we anticipate a high quality of
Главная цель форума — организация открытой площадки для обсуждения вопросов государственной политики в управлении интернетом в странах Центральной Азии. В рамках форума будут подняты вопросы кибербезопасности, свободы регулирования интернета, развития DNS индустрии и расширения доступа к интернету, также будут рассмотрены глобальные и национальные подходы к управлению сетью интернет.

Для участия в Форуме приглашаются специалисты в области развития и управления интернетом — председатели государственных органов из стран Центральной Азии, телекоммуникационных и интернет компаний, исследовательских центров и неправительственных организаций со всего мира.

Форум организован Министерством транспорта и коммуникаций Кыргызской Республики и Общественным «Гражданской Инициативы Интернет Политики», при поддержке OpenDyn Foundation, ICANN и Internet Society.

What do Kiwis think of the Internet?
Over NL IGF:

Privacy en toegankelijkheid.

Tegelijkertijd hebben deze vraagstukken onmiskenbaar gevolgen op nationaal niveau. Bijvoorbeeld voor onze Nederlandse wetgeving. Maar ook voor het beleid van Nederlandse organisaties en ondernemingen. En andersom zijn er specifieke internetgerelateerde aspecten die in Nederland spelen, maar die ook mondiaal relevant zijn. Om daarover in Nederland met betrokkenen van gedachten te kunnen wisselen, werd in navolging van het IGF het Nederlands Internet Governance Forum (NL IGF) opgericht.

Wat zijn de doelstellingen?

Het NL IGF is een gezamenlijk initiatief van het ministerie van Economische Zaken, de beheerder van het .nl-domein SIDN en ECP | Platform voor de

Un Internet libre y para todos

Interesados en promover un Internet libre, abierto, seguro, estable y de acceso universal, nos proponemos crear un espacio de debate entre las múltiples partes interesadas (academia, gobierno, sociedad civil, empresa privada, comunidad técnica, entre otras) para la identificación de las prioridades en torno a la Gobernanza de Internet en Panamá.

How to add an RSS feed to your website?

Check if your website has an RSS reader plug-in

Place it on the webpage where you want the feed to be displayed

Add an URL from the GIPO Tool to the page
The Global Internet Policy Observatory (GIPO) project is supported by the European Commission.

An example of GIPO RSS output feed
How to navigate through the dashboard in a simple way?

Dashboard panels are interactive, so just click and experiment. First use the top input panels (search queries and time interval) to specify the scope of the information you want to play with.

Then click on the elements of the display panels and/or their options to navigate / refine / reshape your initial guess.

You will see all the rest of the panels readjusting their information accordingly.
How to display results only in a preferred language?

Type BOTH: your search query and a code `lang:fr` (FR for FRENCH etc.)

Language codes are standardised: ISO 639-1
