Subject: Connecting Next 1 billion

Dear Sir's

good morning. As part of global efforts to connect next 1 billion we must think beyond that is connecting next 3.4 billion middle class and poor people who are in villages and most of them are farmers and also uneducated , Refuges , war victims , people living in slums etc. In India most of people are farmers and middle class effecting due Rapid thinking of creating smart cities rather than creating smart villages and also local self development. with my ground realities

interactions with people , politicians (Both criminal and Good) , Bureaucrats (most corrupt and non corrupt) , Crony capitalists (Most global wealth is with 20 percent of world) , Banks (nationalized banks etc) , NGO's , Anti corruption activists lastly Spiritual Gurus (hear are also divisions) what a found is socities are also gone into greddiness cycle who ever got power they will move with them as honey bees.

The answer can be reached by simple 7 SDG's what we need

This is what i am pushing from last 20 years and also we came with smart villages connecting SDG's Rather than 17 areas we can have 7 areas

- 1) Grow your own education knowledge food energy security
- 2) open Knowledge and open Finance inclusion . Peer to peer financing
- 3) health / Sanitation
- 4) local Growth all are equal / local commerce is imp.
- 5) open Jobs open Business based on local Talents / skills
- 6) open connectivity
- 7) Free / affordable Houses no slavery no refugees life.

<http://www.smart.ap.gov.in/myvillage/>

Just like venture capitalists / Old students funds / old mother land that is village born people can

create for local development. What we found in India every 1 rs government spends 80 percent goes to corruption waste and no qos of works etc . if we change this we came make next 3.4 billion safe and also eco system mother earth.

Good day to you all.

Kanumuri s raju
