Field summary for A

The multidisciplinary stakeholders interested in the development, deployment and governance of blockchain technologies should move the focus of analysis beyond distribution of infrastructure in decentralized technologies, and instead identify the specific goals that the infrastructure is designed to achieve.

Answer	Count	Percentage	Sum
1 (1)	0	0.00%	14.29%
2 (2)	1	14.29%	
3 (3)	2	28.57%	28.57%
4 (4)	3	42.86%	
5 (5)	1	14.29%	57.14%
No answer	1	12.50%	
Arithmetic mean	3.57		
Standard deviation	0.98		
Sum (Answers)	7	100.00%	100.00%
Number of cases	8	100.00%	

Field summary for A

The multidisciplinary stakeholders interested in the development, deployment and governance of blockchain technologies should move the focus of analysis beyond distribution of infrastructure in decentralized technologies, and instead identify the specific goals that the infrastructure is designed to achieve.

Field summary for B

In the context of the blockchain's decentralized architecture, a successful blockchain technology governance framework must both enable (a) a system that is resilient against a take-over at the institutional (social, economic or political) layer, and (b) design criteria of open access, inclusiveness and distribution of control.

Answer	Count	Percentage	Sum
1 (1)	0	0.00%	0.00%
2 (2)	0	0.00%	
3 (3)	3	42.86%	42.86%
4 (4)	2	28.57%	
5 (5)	2	28.57%	57.14%
No answer	1	12.50%	
Arithmetic mean	3.86		
Standard deviation	0.9		
Sum (Answers)	7	100.00%	100.00%
